PRESS RELEASE

SIT is attending Enlit Europe 2022 in Frankfurt

The companies MeteRSit (smart gas meters) and Janz (water meters), part of SIT group, will present new solutions at Europe's most important fair of the industry

Padua, November 16, 2022 – **The metering division of SIT group**, consisting of subsidiaries **MeteRSit and Janz**, is attending from November 29 to December 1 **Enlit Europe**, one of the largest conference and exhibition events dedicated to the entire energy ecosystem, to explore topics such as energy transition, decarbonization, energy resilience, and digitalization. It is one of the most important events in the industry where SIT **will present new smart and measurement solutions both for water and gas meters.**

SIT's participation at Enlit Europe is consistent with [the company's mission and vision](#), which focuses on the sustainability of the planet and the solutions to achieve it. In this sense, the goals of the [COP27 conference](#) - in particular, **to accelerate the decarbonization process** - are absolutely aligned with those of SIT which, thanks to the ability of its products to measure energy consumption and to manage climate control conditions, has taken a proactive role towards the ecological transition and in the fight against water and gas waste consumption.

Briefly - SIT will be exhibiting at Enlit Europe in Frankfurt with MeteRSit and Janz teams at **booth 12.1 B60** from November 29 to December 1, 2022. For more information please visit the official [Enlit Europe 2022](#) website.

Insight - Metering Division of SIT.

It consists of 2 companies:

- **MeteRSit**: development and sales of **gas meters for residential, commercial, and industrial markets worldwide** (for natural gas, gas mixtures, hydrogen), highly innovative in their metering system, which provides exact measurement of gas delivered, already converted to temperature and independent of pressure, improving customer awareness of energy consumption through daily or hourly storage and frequent data communication. [MeteRSit has also developed the world's first 100% MID-certified hydrogen meter.](#)
- **Janz**: offers a **full range of residential, commercial, and industrial water meters, sensors, software, and connectivity**, with a focus on developing solutions that help to ensure the availability of natural resources for the future of the next generation. "Mywater" technology enables the integration of water meters into smart city projects using IoT (Internet of Things) connectivity. A state-of-the-art fixed, bidirectional telemetry solution for businesses and water distributors that enables interaction with tools and information systems for efficient monitoring and management of residential, commercial, and industrial water consumption without the need for human intervention.

SITspa

SIT, through its two divisions Heating and Metering, creates intelligent solutions for the control of environmental conditions and consumption measurement for a more sustainable world. A market-leading multinational company and listed on the Euronext Milan segment, SIT aims to be the number one sustainable partner for energy and climate control solutions for its customers, focusing on experimentation and the use of alternative gases with low environmental profiles. The Group has production sites in Italy, Mexico, the Netherlands, Romania, China, Tunisia and Portugal, in addition to a commercial structure covering all global markets. SIT is also a member of the European Heating Industry and of the European Clean Hydrogen Alliance, in addition to the Community Valore Acqua per l'Italia ("Value Water for Italy Community") - www.sitcorporate.it/en/
